

# The Tools Menu

\* This menu is accessed via the “Tools” button at the bottom of the Objects and Animation Editor screen.

## Show Grid

- Displays a configurable Grid over all slides in the Objects and Animation window
  - This duplicates the Show/Hide Grid control and its Grid Options window

## Ignore Objects not Selected

- If you have an object/image which is hidden by another object/image, then (with this feature turned on) you can select the hidden image by clicking on the object in the Object List and move or edit it without moving other objects.

## Hide selection on Pan/Zoom/Rotate

- This removes the green “frame” around an object when moving or resizing

## Show Safe TV Zone

- This shows the effect of displaying a PTE show on an older TV

## Show Global Times of Key Frames

- When ticked shows the Key Frame times from the beginning of the project.
- When un-ticked, Key Frame times are show from the beginning of the slide

## Key Frame Width

- This enables the width/thickness of Key Frames to be adjusted.

## Waveforms

- Shows the Options for the Waveforms in Objects and Animation
