Link or Add an Audio File to a Slide

Link an Audio File to a Slide

In Project Options you can add an Audio File/Clip to a Track and link it to a specific Slide Number.

Project Options	IN RADIES BARRIES	COLUMN STATE	x
Main	Add track Add audio file 💉 🖍	• 00:00	03:30
Audio	Track 1 3:30	Original duration	3:30.596
Control		🔽 Link to slide	4
Screen		Offset	-0:15.000
Transitions		Start time	0:00.000
Defaults		Duration	3:30.596 🚔
Advanced		Fade In	0.0
		Fade Out	0.0
		Volume (%)	100 -
		Soundtrack duration	3:30.596
	-	Convert tracks to MP3 Bit rate	for EXE
		ОК	Cancel

- The Audio Clip that you wish to link to a Slide should be added to a new track
- If it is added to an existing track containing other audio clips, it is added at the end of the last clip
- In a track containing more than one Audio Clip and possibly a mixture of Linked and Non-Linked Audio Clips, it is not possible to Cross-fade a Linked Clip with either another Linked Clip or a Non-Linked Clip
- To Cross-fade Linked Clips they must be added to Individual Tracks and the fader sliders (or the fade controls in Project Options/Audio) must be used

In the Timeline

- Highlight a Slide
- Right click on an Audio Clip and the option to "Link Audio Clip" to the selected Slide is available
- The Audio Clip can then be positioned by dragging along the Timeline to the desired position
- Linked Audio Clips which are in the same Track cannot be Crossfaded

- The Audio Clip or recorded Voice Comment is added to a newly created "Track for Audio Comments"
- Audio Files or Voice Comments which are added to other slides are also added to this "Track for Audio Comments"
- By default the start time of an Audio File or Voice Comment is the start time of the Slide to which it has been added
- Crossfading of Audio Clips and/or Voice Comments in the Track for Audio Comments is not possible
- Trimming/Cropping and/or Fading can be done in the Timeline and/or in the Projects Options/Audio Tab

If "Record Voice Comment" is selected:

Record Voice Comment	Record Voice Comment
Record Stop	Codec: MP3 Channels: Mono
	Bit rate: 128 kbps 🔹
0:00.000	Frequency: 44100 Hz 🔹
	Record Device: Primary Sound Capture Driver
Z:\NEF FILES\Facebook JPGs\	
Comment.mp3 Browse	
Parameters	Back to Recording
Save and Exit Cancel	Back to Recording Cancel

- The recorded voice comment is added to the timeline as an Audio Clip in the "Track for Audio Comments"
- The Parameters are:

- Codec MP3 or WAV
- Channels Mono or Stereo
- Bit Rate 32 to 320kbps
- Frequency 44100 is the default
- Record Device will vary according to the User's Computer
