Timeline View

See also the Audio Tab in Project Options.

Audio Files can be dragged and dropped into the Timeline tracks from the Files List.

Note that the position (time) of the added audio file is determined by the "drop" action.

The corresponding Project Options / Audio Tab looks like this:

Last update: 2022/12/19 en-us:10.0:main-window_1:timeline_view https://docs.pteavstudio.com/en-us/10.0/main-window_1/timeline_view?rev=1572632629 11:45

Note that the "Offset" value for the audio file in Track 2 in the above example is from 0 seconds on the Timeline. The "Offset" value for the second audio file in Track 1 would be calculated from the end of the first audio file in Track 1. Fade Ins and Fade Outs made via the Envelope Function are not reflected in the Project Options / Audio Tab.

- Separate Audio from Video The Audio of a Video Clip is extracted from the Video Clip and is inserted into a New Track and can be edited as a normal Audio Track.
 - $\circ\,$ The Audio which remains in the Video Clip is automatically Muted

Scaling the Timeline View

Last update: 2022/12/19 en-us:10.0:main-window_1:timeline_view https://docs.pteavstudio.com/en-us/10.0/main-window_1/timeline_view?rev=1572632629

The Mini Player

- The PLAY button starts the MINI-PLAYER from the Cursor Position
- The STOP Button stops the Mini-Player and returns the Cursor to the previous position
- The time shown at the end of the progress bar shows the End of the Last Slide
- The Four Arrow Icon starts the Full Screen Preview from the Cursor Position

Fade In / Fade Out Brackets

Last update: 2022/12/19 en-us:10.0:main-window_1:timeline_view https://docs.pteavstudio.com/en-us/10.0/main-window_1/timeline_view?rev=1572632629

Images

• Dragging images into the Timeline View is NOT advised. This is best done in the Slide List View. The DROP point overrides the Project Options / Slide Duration default and can lead to confusion.
