# **Timeline View**

See also the Audio Tab in Project Options.

Audio Files can be dragged and dropped into the Timeline tracks from the Files List.

Note that the position (time) of the added audio file is determined by the "drop" action.

The corresponding Project Options / Audio Tab looks like this:

Last update: 2022/12/19 en-us:10.0:main-window\_1:timeline\_view https://docs.pteavstudio.com/en-us/10.0/main-window\_1/timeline\_view?rev=1634912624 11:45

Note that the "Offset" value for the audio file in Track 2 in the above example is from 0 seconds on the Timeline. The "Offset" value for the second audio file in Track 1 would be calculated from the end of the first audio file in Track 1. Fade Ins and Fade Outs made via the Envelope Function are not reflected in the Project Options / Audio Tab.

- Separate Audio from Video The Audio of a Video Clip is extracted from the Video Clip and is inserted into a New Track and can be edited as a normal Audio Track.
  - $\circ\,$  The Audio which remains in the Video Clip is automatically Muted
- **Trim Beginning of Video** The video is trimmed to the position of the cursor. Note that the complete video clip is included in an EXE File. This option is best for MP4 output.

# Scaling the Timeline View

# **The Mini Player**

- The PLAY button starts the MINI-PLAYER from the Cursor Position
- The STOP Button stops the Mini-Player and returns the Cursor to the previous position
- The time shown at the end of the progress bar shows the End of the Last Slide
- The Four Arrow Icon starts the Full Screen Preview from the Cursor Position

# Fade In / Fade Out Brackets

• In the Timeline, an Audio Clip can be faded in or out by means of the Fade In/Out Brackets at the beginning and end of the clip.

• By dragging the bracket along the Timeline a Fade is created:

Last update: 2022/12/19 en-us:10.0:main-window\_1:timeline\_view https://docs.pteavstudio.com/en-us/10.0/main-window\_1/timeline\_view?rev=1634912624

- The Fade In and Out values are reflected in Project Options / Audio
- Likewise, a Fade In or Fade Out value entered in Project Options / Audio is reflected in the position of the Fade In / Out Brackets in the Timeline

# Images

• Dragging images into the Timeline View is NOT advised. This is best done in the Slide List View. The DROP point overrides the Project Options / Slide Duration default and can lead to confusion.
