- Browse a list of Slide Names and choose the required Slide
- Note that multiple Blank Slides and no Main Images appear as a single BLANK Slide.
- Designate a MAIN IMAGE for each Blank Slide

## **Properties of the Button Text**

The Font, Font Size and other attributes (Bold, Italic and Underline) are chosen in the usual way.

The Text in a Button can be assignd a different color for each of the three different states in a published show - Standing, Hover and Clicked.

The illustration shows a Button in Objects and Animation and how it would look in a published show in its three possible states - Standing, Hovered on with the mouse and Clicked on with the mouse.

The colors which can be chosen for the thee different states are shown in the Properties Tab - after an Action on Mouse Click has been assigned in the Common Tab.

## **Action on Mouse Click Options**

#### **Run Slideshow**

The chosen Slide Show must be created in the same version as the Slide Show containing the Link. The Slide Show runs and exits to the Desktop.

#### Run Slideshow with Return

The chosen Slide Show must be created in the same version as the Slide Show containing the Link. The Slide Show runs and returns to the Slide Show containing the link.

#### **Run Application or Open File**

The chosen Slide Show can be created in any version of Pictures to Exe. The Slide Show runs and returns to the Slide Show containing the link.

If a file is chosen as the target, then the file is opened in the default Program for the file type. When the Program is closed you are returned to the Slide Show containing the link.

#### **Run Application and Exit**

The chosen Slide Show can be created in any version of Pictures to Exe. The Slide Show runs and exits to the Desktop.

#### **Print Picture/Slide**

Allows the viewer to Print the whole slide or the Main Image

#### Help

Displays an "Information" box.

- Click on OK to return to the show
- Configure the Information Box in Project Options / Advanced Tab / Windows (Help, Startup, Custom)
- Click on Edit Help Window
- Edit the Text

#### **Open Web Page**

Opens a Browser Window with the target Web Page. Close Browser to return to the Slide Show.

#### Write E-Mail

Allows viewer to send e-mail to designated e-mail address.

#### **Next Slide**

Next Slide

#### **Previous Slide**

Previous Slide

#### Go To First Slide

Slide One

#### Go to Slide With Name

Go to a predetermined slide. Only works if the slide has a designated Main Image. Multiple Blank Slides cannot be differentiated.

#### Pause

Pause the Slide Show

#### Exit

Exit the Slide Show

#### **Show Window**

- Similar to "HELP"
- Displays an "Information" box.
- From the Main Screen
- Configure the Window in Project Options / Advanced Tab / Windows (Help, Startup, Custom) / Customize...
- Click on Custom Windows / Add Window (Window1,2,3 etc)
- Click on Edit Window
- In the Windows Editor, add a Rectangle and Text
- Click Close to Save
- In Objects and Animation choose "Show Window" for the Hyperlink and in the dropdown menu choose "Window1,2,3 etc"
- Click on the Button in Preview or Exe to display the Window
- Hit Escape on keyboard to close the Window or add a Close Window Button

## **Close Window**

• Closes the Window opened in "Show Window"
