

Applying a Style

To apply a Preset Style

- Drag or otherwise add an Image to the Slide List
- Open the Style Dialogue by clicking on "Slide Style"

- In the above example you are told that the Style requires one image and that you have correctly supplied one image
- It is possible to add more than one image, highlight them all and the Style will be applied to all
- The Preview Screen will show the animation/effect
- The Speed and Full Duration of the Style are interlinked and either can be used to match the Style to your desired Duration
- The Options parameter varies and is at present only available in PTE's own Preset Styles

- In the above example you are told that the Style requires six images and that you have incorrectly supplied five images
- You can add image(s) by either clicking on the Add Images Button or the + (Plus) Button
- The Preview Screen will show the animation/effect
- The Speed and Full Duration of the Style are interlinked and either can be used to match the Style to your desired Duration

The screenshot shows the 'Styles and Themes' window. On the left, a list of styles is shown, with 'Watercolor' selected. The main area displays a preview of a watercolor-style image of a house. Below the preview, the 'Information' section states 'You chose 2 images' and 'Style used one or more images'. The 'Duration' section has a 'Speed' slider set to 100% and a 'Full duration' of 12.000s. A red box highlights the 'Keep slide order' checkbox, which is currently unchecked. At the bottom, there are 'Tools', 'Styles', and 'Themes' tabs, and 'Apply' and 'Close' buttons.
