The Properties of the TEXT are shown in the Properties Tab on the Right.

Choose a Font from the dropdown Menu and other attributes such as Bold, Italic, Underlined and/or Color.

Clicking on "Save and use by default" will memorize these settings for future use.

#### Font Size

Note that there is no Font Size but that the Text Box has a Percentage Zoom which controls the size of the Font.

 $\times$

Note also that one line of Text in the above example = 15% Zoom. Two lines of Text = 30% Zoom; three lines of Text = 45% etc. This relationship will continue until the size of the "bounding box" is altered via a mouse action.

In the next Example it can be seen that One line of Text at 6% gives the same Font Size as 16 lines of Text at 96% Zoom. Knowing this relationship allows the user to create a consistent Font Size across multiple Slides.
