2025/11/01 01:24 1/1 Add a Video to the Slide List

# Add a Video to the Slide List

#### To Convert or Not to Convert

- Files which do not need Conversion .avi
- Files which need conversion .mov; .mp4 etc
- If you are unsure then dragging or otherwise adding a file to the Slide List will, if necessary, suggest Optimisation (Conversion to .avi)

#### **Unconverted Video**

#### **Dragging into Slide List**

- A file which is of the type which requires Optimisation (.mov; .mp4 etc) can be dragged (left click and drag) into the Slide List
- A Window pops up to suggest that you should Optimise the File
- It is advisable to always accept this suggestion and Click on Optimise you can save to the same folder as the original or change to a different folder location
- The original file is added to the Slide List and the Slide Duration will be equal to the Video Clip Duration
- It is (if required) possible to intercept the Optimisation Dialogue see below
- The file is then saved as Filename.converted.avi
- The original file (after conversion) is replaced by the Filename.converted.avi File in the Slide List

### **Right Click Menu**

## **Converted Video**
