2025/12/02 08:49 1/3 Create Custom Transitions

# **Create Custom Transitions**

- To Enter the Custom Transition Window click on the AB symbol in a slide
- Then click on the Manage Transitions button

- In Version 9 Custom Transitions can be saved either in the "Global Storage" or "Embedded" into the Current Project
- Click on Create Transition to enter the "Create Transition Effect" Editor

### **Create Transition**

- By choosing "Global Storage" the Custom Transition will be available for future projects
- CT's in the Global Storage can be Cloned and Moved to the Embedded Transitions area (current project)
- By choosing "This Project" the Custom Transition will be available in this project only
- Next, choose a Variant

• Choose Background Options and Click on Edit

### **Single Variant**

• The Aspect Ratio is automatically chosen to suit the Project Options AR

#### **Multi Variant - List**

- Click on "+" to add a Variant to the List
- Click on "-" to Delete a Variant
- Click on Edit to proceed to the Editor
- Close the Editor Window by clicking on the "X" at top right to return to this Window
- · Click on OK to Save

### **Multi Variant - Buttons**

- Choose a Preset Variant
- Click on an Arrow Button
- · Click on Edit to proceed to the Editor
- Close the Editor Window by clicking on the "X" at top right to return to this Window
- · Click on OK to Save

After Creating a Custom Transition it would be good practice to Export it to a folder somewhere on your HD called "Exported Slide Styles"

## **Global vs Embedded Transitions**

- The **Global Transitions** section contains both the Preset PTE Transitions and the Custom Transitions which you can Create yourself or Import from the Forum etc.
- The "Manage Transitions" button has a dropdown menu which allows the Option to "Clone" a Custom Transition
- The Cloned Copy can then be either edited to create a Variation or "Moved to the Local Storage" (Embedded Transitions)
- When creating a "Backup in ZIP" (BIZ) to export to another PC which might not have the Custom Transition it is included for use when the BIZ is unzipped
- The Global Custom Transitions are Embedded in Executable files.
