2025/12/02 08:56 1/2 Create Custom Transitions

Create Custom Transitions

- To Enter the Custom Transition Effect Window click on the AB symbol in a slide or:
- Click on Project Options / Transitions
- Then click on the Manage Transitions button

- Give the Transition a descriptive name
- Choose an existing Category or Type in a New Category Name
- Next, choose a Variant

Choose Background Options and Click on Edit

Single Variant

• The Aspect Ratio is automatically chosen to suit the Project Options AR

11:20

Multi Variant - List

- Click on "+" to add a Variant to the List
- Click on "-" to Delete a Variant
- Click on Edit to proceed to the Editor
- Close the Editor Window by clicking on the "X" at top right to return to this Window
- Click on OK to Save

Multi Variant - Buttons

- Choose a Preset Variant
- Click on an Arrow Button
- Click on Edit to proceed to the Editor
- Close the Editor Window by clicking on the "X" at top right to return to this Window
- · Click on OK to Save

After Creating a Custom Transition it would be good practice to Export it to a folder somewhere on your HD called "Exported Slide Styles"

Global vs Embedded Transitions

- The **Global Transitions** section contains both the Preset PTE Transitions and the Custom Transitions which you can Create yourself or Import from the Forum etc.
- The "Manage Transitions" button has a dropdown menu which allows the Option to "Clone" a **Custom Transition**
- The Cloned Copy can then be either edited to create a Variation or "Moved to the Local Storage" (Embedded Transitions)
- When creating a "Backup in ZIP" (BIZ) to export to another PC which might not have the Custom Transition it is included for use when the BIZ is unzipped
- The Global Custom Transitions are Embedded in Executable files
