Add a Mask Object

To add a Mask Object you can:

- Click on the "M" Icon at the top right hand side of the Objects and Animation Screen
- Right Click in the Object Panel or Main Screen in Objects and Animation and choose to "Add a Mask"

You are offered three alternatives

Add	>	Image	Ctrl+1		
Put to Center Cover Screen Order	Alt+S >	Button Rectangle Text or Hyperlink	Ctrl+2 Ctrl+3 Ctrl+4		
Cut	Ctrl+X	Video	Ctrl+5		
Сору	Ctrl+C	Mask > Splitter for background objects		Add Mask Template Add Mask Image/Video Add Blank Mask Ctrl+1	
Paste Remove	Ctrl+V Del				
Edit File	Ctrl+W	•	1 Alter	Contractory of the second	-
File Info	Ctrl+I				

Add a Mask Template

• Choose from Circle or Rectangle

Add Mask		×	Add Mask		×
Style	Circle	•	Style	Rectangle	•
Size in pixels	1024 ~ 👌 [1	1024 ~	Size in pixels	1024 🗸 👌 1024	~
Width of blur	50 ~ %	6	Width of blur	50 ~ %	
Corner radius	50 ~ %		Corner radius	50 ~ %	

- Click OK to add the Mask to the Object Panel
- A Rectangle Mask is added to the Mask Stencil

• Right Click on Mask Content and Add / Image

- You can then add Animation to the Image within the Mask
- You can Zoom, Pan etc the Mask Container

Add a Blank Mask

• You can add a Blank Mask to add your own Image as a Mask

Last update: 2022/12/18 11:20

The MASK can be a Preset Template Mask or an Image or Video.

Template

In the Template section choose either Circle or Rectangle for Style.

Size and Width of Blur can be adjusted for a circular mask. If a rectangular mask is chosen the addition Corner Radius is available. Clicking on the button between the Horizontal and Vertical parameters in "Size in Pixels" allows an elliptical / oval mask to be created. Click on OK.

You can now add an image to the Mask Container. The mask allows the portion inside the circle to be seen.

If the Mask Container is added to an Image (as a Child) then the Mask allows you to see through the Parent Image to the image contained in the Mask.

en-us:9.0:how_to_v9:mask https://docs.pteavstudio.com/en-us/9.0/how_to_v9/mask?rev=1488021243

The Size and Appearance of the Mask Container, the Mask and the contained Image can be adjusted per Key Frame.

Image or Video

Last update: 2022/12/18 11:20

You can also create a mask in an external editor and use that in place of the Template version.

The "Image Mask" should be "white and black" or or "white and transparent".

In the example below a white diamond shaped transparent png has been used.

9/9

See "Create a Simple Pan" for an example of basic Key Frames.
