

# Text Formatting Tips

## Centre Point Anchor

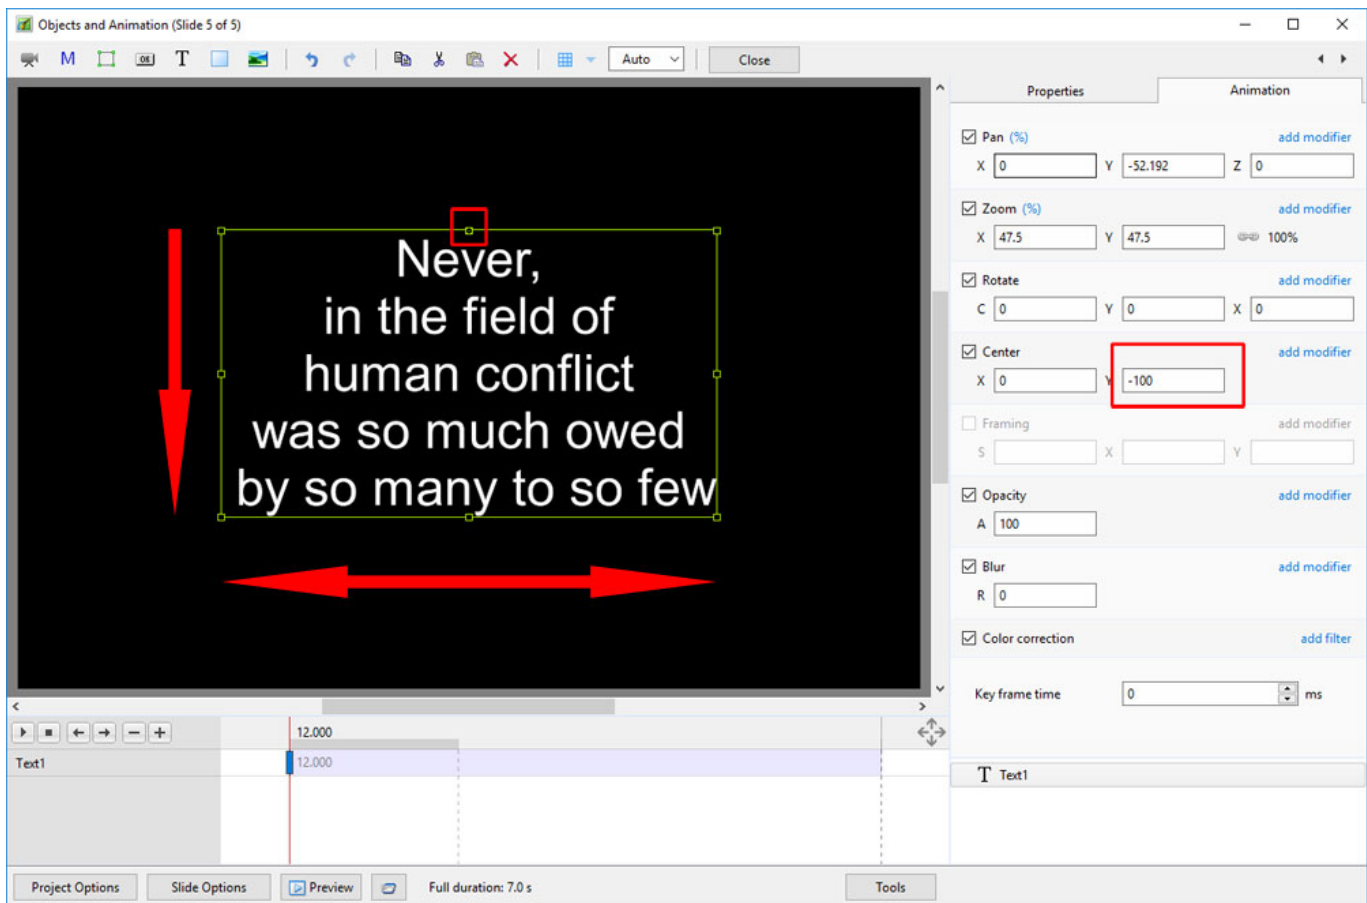

- In a Default Text Box in Objects and Animation the “Box” will expand vertically and horizontally according to the amount of text which is input

- Note that the Text Box in the above example is “Anchored” around the Centre Point of the Box and therefore expands both Vertically and Horizontally about the Centre

## Centre Top Anchor

- Moving the “Centre Point” to the top of the Text Box changes the way in which the text expands

- Note that while the Text Box still expands Horizontally it only expands Vertically in the Downward direction
