

Key Frames

Animation

- Key Frames are used to animate an Objects/Images in Slides
- Two or more Key Frames are required to specify an animation
- The first Key Frame is automatically added at zero milliseconds on the Objects and Animation Timeline when an object/image is added to the slide and will specify the Pan, Zoom and Rotate (PZR) parameters at the beginning of a Slide
- Subsequent Key Frames will specify the PZR parameters with respect to time in the Objects and Animation Timeline

First Key Frame

Last Key Frame

A Pan has been programmed by adjusting the Center and Pan Parameters of the Key Frame at 0 ms and the Key Frame at 7000 ms.

Shift Key Frames

- Control+E will access the Shift Key Frames window
- Specify the amount and direction
