

Properties Tab

For Images

- Picture - Shows the Path and file name of the selected object. Also allows the image to be changed easily.
- Main Object and Index Number - see [Slide Styles](#)
- Edge Antialiasing - Reduces the effects of Aliasing - Further reading - [External Link](#)
- Low Quality of resizing - helpful only when it is necessary to use bilinear filtration while zooming the image
- Sharper Smoother - Minus values Sharpen and Image. Positive values Soften an Image.

For Video

- Video - Shows the Path and file name of the selected Video Clip. Also allows the Video to be changed easily.
- Main Object and Index Number - see [Slide Styles](#)
- Edge Antialiasing - Reduces the effects of Aliasing - Further reading - [External Link](#)
- Do not include file to EXE - Allows the file size to be kept low by linking to an external folder
- Mute Audio - Mutes the Audio of a Video Clip
